

4. Write the equation of the line passing through the point $(-2, -8)$ with a slope of 3.

5. Write the equation of the line that passes through the points $(4, 10)$ and $(6, 11)$.

6. Write the equation of the line that passes through the points $(-4, -3)$ and $(2, 6)$.

7. Write the equation of the line that passes through the points $(-1, 4)$ and $(3, 2)$.

8. Write the equation of the line that has a slope of 7 and passes through the point (2, 3).

9. Write the equation of the line that passes through the points (-5, -1) and (5, 4).

10. Write the equation of the line that has a slope of -3 and passes through the point (6, -7)

11. Write the equation of the line that passes through the points (4, 2) and (10, 6).

12. In the area below, create a 5-question quiz on writing linear equations in slope-intercept form. Be sure to include questions where you are given a slope and a point, and questions where you are given two points. When you are finished writing the quiz, switch with a partner and take their quiz while they take yours!
