

## IM1 Problem Set 8 - More work with slope - Daily Tasks

Task 1	Task 2	DC
Put solutions to problems from the previous Problem Set on the board	Discuss all problems and come to a consensus. Record solutions in your notebooks and present solutions.	DC

### Problem Set 8

<b>8.1</b>	Simplify the following algebraic expressions:  a. $(3a^3)^2 (3^3 a^5)^3$ b. $\frac{(m^3)^3 (2m^2)^4}{(3m)^2}$												
<b>8.2</b>	Evaluate a. $4x^2 + 5$ for $x = -3$ b. $5 - 2x^{-1}$ for $x = 2$ c. $2 - 5(x + y)^2$ for $x = \frac{2}{5}$ and $y = \frac{1}{4}$												
<b>8.3</b>	Solve for $x$ :  a. $\frac{5}{6}x - \frac{3}{4} = \frac{1}{4} - \frac{1}{5}x$ <div style="text-align: center; margin: 10px 0;">  </div> b.												
<b>8.4</b>	Consider the function $f(x) = -2x + 5$ <div style="display: flex; align-items: center; margin-top: 10px;"> <div style="border: 1px solid gray; padding: 5px; margin-right: 20px;"> <table style="font-size: small; border-collapse: collapse;"> <thead> <tr> <th style="border: none;">x</th> <th style="border: none;"><math>-2x + 5</math></th> </tr> </thead> <tbody> <tr><td style="border: none;">-2</td><td style="border: none;">9</td></tr> <tr><td style="border: none;">-1</td><td style="border: none;">7</td></tr> <tr><td style="border: none;">0</td><td style="border: none;">5</td></tr> <tr><td style="border: none;">1</td><td style="border: none;">3</td></tr> <tr><td style="border: none;">2</td><td style="border: none;">1</td></tr> </tbody> </table> </div> <div style="flex-grow: 1;">  </div> </div> <ol style="list-style-type: none"> <li>a. Looking at the graph, is the line going “uphill” or “downhill”?</li> <li>b. Choose two of the points in your table and calculate the <i>slope</i> of the line. Make the same calculation for several other pairs of points. What do you notice?</li> <li>c. What is special about the point with 0 as its <math>x</math>-coordinate?</li> <li>d. What do the <math>-2</math> and the <math>5</math> represent in the original equation?</li> </ol>	x	$-2x + 5$	-2	9	-1	7	0	5	1	3	2	1
x	$-2x + 5$												
-2	9												
-1	7												
0	5												
1	3												
2	1												

<p><b>8.5</b></p>	<p>The cost of a banquet is \$450 for the room plus \$15 for every person served.</p> <ol style="list-style-type: none"> <li>Create a table of values for 0,10,20,30,40,50 people served.</li> <li>Prepare a scatter-plot to represent the relation between the number of people and the cost and draw in the line of best fit.</li> <li>What is the slope of this line and what does it represent?</li> <li>What is the y-intercept of this line and what does it represent?</li> <li>Mr S has \$846. Can he pay for 27 guests? Show the reasoning for your answer.</li> </ol>
<p><b>8.6</b></p>	<p>Given the graphs of the following lines, determine their (i) slope and then (ii) their equation</p> <div style="display: flex; justify-content: space-around; align-items: flex-start;"> <div style="text-align: center;">  <p>a.</p> </div> <div style="text-align: center;">  <p>b.</p> </div> </div>
<p><b>8.7</b></p>	<p>Charlie has been drawing rectangles:</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  </div> <div style="text-align: center;">  </div> </div> <ol style="list-style-type: none"> <li>Find the area and perimeter of each rectangle.</li> <li>Charlie wondered if he could find a rectangle, with a side of length 10 units, whose perimeter and area have the same numerical value.</li> </ol>
<p><b>8.8</b></p>	<p>Find the area and perimeter of the following shape.</p> <div style="text-align: right; margin-top: 20px;">  </div>
